PROX CARD DOOR LOCK (PASS LOCK)

PASS LOCK is a stylish door locking system for upscale locations.

RF Card Reader with Built-In Door Lock System This unit easy installs and integrates with most existing doors.

Less than 1 second access time.

Communicates with Access Control Software.

No more need to change the Locks ever again.

Schedule and control employee access times using PCPUNCHCLOCK® software, this Access Control unit becomes the ultimate fraud proof time clock which communicates with most popular payroll programs.

Program silent alarm PIN codes to notify law enforcement of emergency situations.

INTEGRATED FINGERPRINT READER & VIDEO PHONE (VIEW PASS)

VIEW PASS brings video surveillance and access control into an integrated high security solution.

Built-in high resolution video camera provides a clear, live real-time audio and video.

Voice prompts guide through setup.

VIEW PASS connects to most video intercoms and DVR's.

Optional PROXY CARD function available.

Perfect for buildings, apartments and complexes.

BIOMETRIC FINGERPRINT RECOGNITION ACCESS CONTROL SYSTEMS

The unique feature of our access control family of products is their ability to operate as standalone devices, or utilizing Time and Attendance or Access Control Software, You can remotely maintain, monitor, manage, and control a virtually unlimited number of devices. All with the click of a mouse. When using our surveillance software, you can remotely open and close any of our device from anywhere in the world using a PC, laptop or PDA and internet network connection.

BIOMETRIC FINGERPRINT READER (FINGER PASS)

FRAUD PROOF OPTICAL scanner integrates with most existing Card systems using Wiegand Protocol.

It provides 9 operation modes using FINGERPRINT/PIN/CARD.

Holds 1,000's of users and transactions locally or an unlimited number when using Aventura's Access Control or Time and Attendance Software.

PROX CARD READER (PASS CARD)

Supports both PIN and PROX CARD modes.

Integrates with all other Bio-Guard® products.
